

I consider satellite radio to be the single best source of entertainment I have ever encountered in my 65 years on planet earth. I have it in my car and my home and it is a constant companion to my wife and myself. Anything that endangers the rights of satellite radio as they now are is a threat to me in a time where personal rights are so stretched thin. I would not endorse any candidate in any way that would prevent me from getting the full benefits that I pay for. Please let this wonderful entertainment source be. Sincerely,
Bernie and Lydia Singer
